Bachelor Controls Named Finalist for System Integrator of the Year

BCI named finalist in inaugural 2007 Control Engineering System Integrator of the Year Award

SABETHA, Kan. (May 30, 2007) — Bachelor Controls, Inc. (BCI) – a leading provider of systems integration solutions – was named a Finalist in *Control Engineering* magazine’s first System Integrator of the Year awards.

“The System Integrator of the Year award is an innovative competition organized by one of the leading industry publications,” said Ray Bachelor, president of Bachelor Controls, “and we are honored to be selected to the list of Finalists in its inaugural year.”

The 2007 System Integrator of the Year award was designed and administered by *Control Engineering* Consulting Editor Dr. Vance VanDoren. VanDoren worked with the Control System Integrators Association (CSIA) and other industry leaders to judge entries from system integrators from all over the world. Submitting system integration firms were split into three categories – based on annual revenue – and each firm was judged on achievements in the areas of technical expertise, business skills, and customer satisfaction.

Bachelor Controls, Inc. was recognized as a Finalist in the “Up to \$10 Million Annual Revenue” category at the most recent CSIA Executive Conference in Santa Fe, New Mexico.

About the Control Engineering Automation Integrator Guide

Every year since 1993, *Control Engineering* magazine has published the “Automation Integrator Guide,” a compilation of resources for industrial automation and control projects. According to the 2007 Automation Integrator Guide, this year’s supplement consists of more than 1,400 system integrators, consultants, and contract engineering firms that can design and install custom automation systems. The Automation Integrator Guide is compiled by Vance VanDoren, PhD, PE, *Control Engineering* consulting editor for system integration and president of VanDoren Industries, Inc., a market research firm covering system integration and industrial process controls. For more information, visit www.controleng.com/integrators or contact Dr. VanDoren at vance@control.com or 765.296.7600.
